President Wilson's interest in a cloture rule for the Senate is understood to be bound up with a determination on his part to reintroduce the Government his part to reintroduce the Government ship purchase legislation at the coming session and with his desire not to permit the bill to be talked to death. Many leading Democrats of the Senate, however, are said to be opposed to the cloture on the ground that unlimited debate would be valuable to the Democrats whenever they might be in the interest.

The Safest Investments Are those that do not fluctuate during disturbed conditions of the money or stock markets. First deed of trust notes (first mortgages), well secured on real estate in the District of Columbia, constitute "gilt-edge" investments. They do not depend upon the financial responsibility of individuals or corporations for their stability, and are exempt from taxation as personal property. We can supply such investments in amounts from \$500 upward. Send for booklet "Concerning Loans and Investments." SWARTZELL, RHEEM &
